**E-Complex Deluge Electrical System:** On February 28, 2020 a contractor track hoe ran over a buried 1 inch water line on the South side field area of Building 4010. The buried water line was once used to feed temporary trailers which was capped and left pressurized. S-3 shops were called out to find and close the water supply valve. There were no interruptions of water to any facility. A Close Call SSC form 1627 was completed and submitted.
