- 8:25 – 8:30 AM Questions and answer session.

MINUTES FOR APRIL CONTRACTOR SAFETY MEETING

April 2, 2015

- Robert Necaie (Jacobs FOSC Safety)
 - Presentation on Summer Bites and Stings.
- Daryl Kosturock (Bastion Safety)
 - Presentation on March 2015 construction safety findings, close calls and mishaps.
- Questions and answer session.
 - There was one question.
 - Question: Why am I not able to get SSC Configuration (orange) tags from the warehouse anymore?
 - Answer: NASA removed the “Configuration” tag from the SSC LO/TO program a few years ago. However, the FOSC procedure still allows for the use of the tag. FOSC continued to use the “NASA” configuration tags from bench stock (warehouse) until they were gone. Now that the NASA tags are gone, FOSC has generated their own configuration tag, internally. As a FOSC Service Contractor, you are required to follow FOSC procedures. Therefore, it is recommend to contact FOSC Safety to obtain the updated tag, along with any training requirements for the use of the new tag.
