MINUTES FOR OCTOBER CONTRACTOR SAFETY MEETING October 6, 2011

- John Lindsay (Jacobs FOSC Safety)
 - Presentation on Sling and Rigging safety.
- Mike Rewis (NASA Safety)
 - Presentation on September 2011 mishap statistics.
- Daryl Kosturock (Bastion Safety)
 - Presentation on September 2011 construction safety findings, close calls and mishaps.
- Questions and answer session.
 - There were questions on the SSC Lightning procedure and warnings. Contractors were reminded that if they are unable to understand the warnings, they can call **228-688-3636**, at any time to check on the site status, as it pertains to any active warnings. They were also reminded that in planning their projects, they were not to rely solely on the SSC lightning warning system. Preplanning on their end should include checking local weather forecasts and as well as current conditions regularly.

It was also reiterated to all contractors that if an issue should arise whereby compliance to a particular procedure might not be followed, due to a greater hazard, the contractor should not be making the decision be out of compliance on their own. There are proper channels to bring SSC Management on board in assessing the risk, prior to proceeding.
