

SAFETY TALKS! FOR POWERPOINT

Set a Safe Example for New Co-workers

Everyone once was the new person on the job.

Remember what it was like? □□□□

As a new worker you probably were:

- **Glad to have the job**
- **Scared to make a mistake**
- **Trying to impress the boss**

The first few weeks can be tough, with:

- Practical jokes by co-workers
- Lack of supervision
- Lack of help from co-workers

A new worker goes through a training program.

Guidance from experienced workers is important.

Things can go badly for a new worker:

- Just feeling silly sometimes
- Or being seriously injured
- Or being killed

Real-life tragedies happened to inexperienced workers:

- A hand cut off by a meat slicer
- Died in a fall off a mountain
- Killed by an ore carrier

If you are an experienced worker:

- Take responsibility for your co-workers' safety
- Correct or report unsafe work practices
- Wear your PPE
- Use safe work practices

SAFETY TALKS! FOR POWERPOINT

Set a safe example.

***You might save the new
worker's life.***
