SSC Voluntary Protection Program

The Voluntary Protection Program (VPP) Star Program is designed for exemplary worksites with comprehensive, successful safety and health management systems. Each year, SSC conducts a self-evaluation to measure the success and identify areas needing improvement. NASA SSC documented policy states, “NASA SSC is committed to the philosophy that safety and health program performance is dependent upon the pursuit of continuous improvement. It is for this reason that the VPP program is placed in high regard. Protection of our workforce and visitors remains our highest priority. Safety shall be both an individual and organizational responsibility for all who work at NASA SSC. It shall be our charter to strive to achieve a Safety and Health Program that prevents mishaps and meets or exceeds NASA, Federal, and Occupational Safety and Health Administration (OSHA) VPP requirements.”

- 1) Promote awareness of eye safety and the required Personal Protective Equipment (PPE)

- 2) Increase employee awareness of fall protection and slip/trip/fall hazards

- 3) Continue to promote awareness of proper housekeeping and material storage in facilities and on construction sites
